

# Company Principal Components

Every company can be broken down into only 8 principal components

## 8 Principal Components

All company departments, teams, headcounts and expenses can be mapped onto 8 principal component. With this, a company can analyse how much of its internal resources are used for which principal component activity and if it is rather product, control, internal services, resource or asset oriented.

- A. Departments or teams with headcount and expenses
- B. External legal or regulatory requirement
- C. Product
- 1. Governance
- 2. Company management
