

Principal Components

Every company can be broken down into only 8 principal components

8 Principal Components

All company functions and expenses can be mapped onto a principal component. With this, a company can analyse how much of its internal resources are used for which principal component activity and if it is rather product, control or internal services oriented.

- A. Functions and expenses
- B. External legal or regulatory requirement
- C. Product
- 1. Governance
- 2. Company management
- 3. Internal services
- 4. Management of immaterial assets
- 5. Fulfilment of ext. requirements
- 6. Product management, sales and operations
- 7. Management of resources incl. material assets
- 8. Control
